

In the claims:

1. (Currently Amended) A single use catheter, comprising:
a lumen having a proximate end and a distal end,
an inflatable cuff surrounding said lumen,
said lumen having a first and second conduit,
said first conduit in fluid communication with
said inflatable cuff,
said second conduit in fluid communication with
said proximate end of said lumen,
a port at an end of said first conduit, and
a one-way valve in said port, said one-way port
allowing inflation of said cuff but not allowing deflation whereby
said first conduit must be cut to deflate said cuff.

2.(Original) The single use catheter of claim 1, further
comprising a syringe attached to said port.

3.(Original) The single use syringe of claim 1,
further comprising a hydrophobic filter tip on said lumen proximate
end.

4.(Original) The single use syringe of claim 1,
further comprising a charcoal filter in said second conduit.

5. Cancelled

6. Cancelled

7.(Currently Amended) A single use catheter, comprising:
a first conduit having a proximate end and a distal
end,
a second conduit having a proximate end and a distal
end, said second conduit parallel to said first conduit,
an inflatable cuff surrounding said first and second

~~conduit conduits,~~

said first conduit in fluid communication with said inflatable cuff, and

a one way valve at said distal end of said first conduit, said one-way port allowing inflation of said cuff but not allowing deflation whereby said first conduit must be cut to deflate said cuff.

8.(Original) The single use syringe of claim 7, further comprising:

a port at said first conduit distal end, and
a syringe attached to said port.
